

## STATEMENT OF PURPOSE

Being an ambitious girl with big dreams of doing high level corporate jobs at multinational companies introduced me to the significance of International education. Keeping a broader and clear view of international perspective in this generation of development is the need of the hour. Studying a global Curriculum in terms of Business and management along with the apprehension of different aspects of Leadership, communications, creativity, Problem-solving and teamwork will make me grow in a different and positive way. On the basis of these grounds I wish to pursue my higher management studies in Canada which will help me to expand my area of interests and professional footprints along with boost in my creative ideas.

### Academic and Work Background

I, X, have completed my schooling from well renowned Public school, which is one of the best education institute of the education hub, and is famous for providing quality learning blended with Indian Vedic Culture. I am honoured to have passed out from this school with First division (66.4%) and Honours (75%) in 10<sup>th</sup> and 12<sup>th</sup> respectively. Because I scored highest in business studies and accountancy in my senior year and also due to my increasing inclination towards management, I decided to Pursue my 3 year undergraduate course of Bachelor of Business Administration (B.B.A) from in 2011 and earned the degree in first division in 2014. After that I pursued Masters of Business Administration (M.B.A) from Campus starting in mid 2014 and completed it in mid 2016 with Honours and scored 75%.

Soon after that in 2016 only, I was selected in an on campus placement drive and recruited by HDFC bank, as Assistant Manager. This was challenging as I use to be an introvert and I had to deal with new faces daily, interact with them and make sure that they are satisfied with the services provided. This was my first Job and I gave my blood and sweat to it and worked at two desks at a time when it was needed. I served at this bank at the time of Demonitisation as well in November 2016 during which I even worked for 12 hours straight at teller counter dealing with crores of cash and I am proud to say that I was the only one in my branch who didn't had any discrepancy in cash in this tough times for which I was awarded.

In 2017 got married and decided to work at an office closer to my new home and switched to X Limited in X as Financial Assistant. Here, I was responsible for management reports, Payment Authorisation, Bank account reconciliations and claims authorization. Many big projects of fabrication of various industries were bagged by the company during my tenure and this helped in my understanding towards entrepreneur functioning. In February 2019, I finally switched to Clone, my present employers where I was appointed as business Support Executive. Here I deal with accounts and audit of around 35 clients of a well known international financial advisory company, "Deloitte". Dealing with these foreign colleagues of mine on daily basis gave me much needed confidence and reasons to go abroad and earn an international degree. There level of Experience, knowledge, network and creativity makes me realise what is actually missing in my resume and why my career is stagnating now.

### Why Canada and X college

Canada, being the 3<sup>rd</sup> best country in the world for education grabbed my attention when I was researching for my post graduate studies. It's range of world class universities and colleges which provide top notch technical as well as professional training is what I need right now to take my career to that next level. The diverse culture and welcoming environment of Canada's educational institutes worked as a cherry on the cake for me. I searched for the best post graduate course I can opt for which will help me in giving that extra push to my Finance work-line and I came across Global Business management course of college, which is ranked in top 70 colleges and universities of Canada. This college and course helps in Preparing for wide variety of management careers which include Finance as well and focuses on developing qualities that businesses want in their financial managers. The

added bonus of Co op or work placement in 4<sup>th</sup> semester will make me gain hands on and practical work experience in a totally new country which will help in pushing my limits, getting out of my comfort zone and give me a new perspective in my future vocation growth. X college's ranking in the Canada's Educational institutes list also backed up my decision of studying from here.

### **Future Plans**

After completion of my post graduate programme, I am planning to return to my home country with that extra skill set and knowledge through programme of X college, along with the 2 month work experience which I gained in Canada during co op. These aspects will help me in moving my career forward and will give me massive career opportunities in big multinational companies here in India. This Global exposure in terms of studies, work, network and strategies will lead me to gain substantial experience and knowledge which will prevent that stagnation point in my work-life which I am facing right now. In next 5 years I am eyeing to be employed in a top Multinational company of India at an executive level with an extensive work graph.
